CONTENTS

VOLUME 105 · NUMBER 1 · JANUARY 1995

1 PETER H. BACKX, WEI-DONG GAO, MICHELLE D. AZAN-BACKX, and EDUARDO MARBAN. The relationship between contractile force and intracellular [Ca^{2+}] in intact rat cardiac trabeculae

21 MICHAEL L. JENNINGS. Rapid electrogenic sulfate-chloride exchange mediated by chemically modified band 3 in human erythrocytes

49 J. J. ART, Y.-C. WU, and R. FETTIPLACE. The calcium-activated calcium channels of turtle hair cells

73 VICTOR PRATUSEVICH, CHUN Y. SEOW, and LINCOLN E. FORD. Plasticity in canine airway smooth muscle

95 KYRILL Y. UKHANOV, THOMAS M. FLORES, HSIO-SHENG HSIO, PRAMIT MOHAPTRA, CATHERINE H. PITTS, and RICHARD PAYNE. Measurement of cytosolic Ca^{2+} concentration in Limulus ventral photoreceptors using fluorescent dyes

117 M. JUUSOLA, R. O. UUSIYALO, and M. WECKSTRÖM. Transfer of graded potentials at the photoreceptor-interneuron synapse

149 SAMUEL S.-H. WANG, ADAWIA A. ALOUSI, and STUART H. THOMPSON. The lifetime of inositol 1,4,5-trisphosphate in single cells

VOLUME 105 · NUMBER 2 · FEBRUARY 1995

177 J. H. RAVESLOOT, T. EISEN, R. BARON, and WALTER F. BORON. Role of Na-H exchangers and vacuolar H^+ pumps in intracellular pH regulation in neonatal rat osteoclasts

209 ADAM ZWEIFACH and RICHARD S. LEWIS. Rapid inactivation of depletion-activated calcium current (I_{CRAC}) due to local calcium feedback

227 ROBERT T. DIRKSEN and KURT G. BEAM. Single calcium channel behavior in native skeletal muscle

249 M. INOUE and I. IMANAGA. Phosphatase is responsible for run down and probably G protein-mediated inhibition of inwardly rectifying K^+ currents in guinea pig chromaffin cells

267 JOHN MCHUGH, WAI MAN MOK, GING KUO WANG, and GARY STRICHARTZ. Irreversible inhibition of sodium current and batrachotoxin binding by a photoaffinity-derivatized local anesthetic

289 MARÍA TERESA PÉREZ-GARCÍA, TIMOTHY J. KAMP, and EDUARDO MARBÁN. Functional properties of cardiac L-type calcium channels transiently expressed in HEK293 cells. Role of α_1 and β subunits

VOLUME 105 · NUMBER 3 · MARCH 1995

309 TOSHINORI HOSHI. Regulation of voltage dependence of the KAT1 channel by intracellular factors

329 BRUCE D. SCHULTZ, CHARLES J. VENGLARIK, ROBERT J. BRIDGES, and RAYMOND A. FRIZZELL. Regulation of CFTR Cl^- channel gating by ADP and ATP analogues

363 KRISTIN ANDERSON and GERHARD MEISSNER. T-tubule depolarization-induced SR Ca^{2+} release is controlled by dihydropyridine receptor- and Ca^{2+}-dependent mechanisms in cell homogenates from rabbit skeletal muscle

385 CHRISTIAN ANDERSEN, MALTE JORDY, and ROLAND BENZ. Evaluation of the rate constants of sugar transport through maltoporin (LamB) of *Escherichia coli* from the sugar-induced current noise

403 SATOSHI MATSUOKA, DEBORA A. NICOLL, LARRY V. HRYSHKO, DIMITRI O. LEVITSKY, JAMES N. WEISS, and KENNETH D. PHILIPSON. Regulation of the cardiac Na^+-Ca^{2+} exchanger by Ca^{2+}. Mutational analysis of the Ca^{2+}-binding domain

421 NANCY FIDLER LIM, NATHAN DASCAL, CESAR LABARCA, NORMAN DAVIDSON, and HENRY A. LESTER. A G protein-gated K channel is activated via β2-adrenergic receptors and Gβγ subunits in *Xenopus* oocytes

VOLUME 105 · NUMBER 4 · APRIL 1995

441 WEI ZHOU and STEPHEN W. JONES. Surface charge and calcium channel saturation in bullfrog sympathetic neurons

463 TERYL R. ELAM and JEFFRY B. LANSMAN. The role of Mg^{2+} in the inactivation inwardly rectifying K^+ channels in aortic endothelial cells

485 MICHAEL E. BRÄU, CARLA NAU, GUNTER HEMPELMANN, and WERNER VOGEL. Local anesthetics potently block a potential insensitive potassium channel in myelinated nerve

507 FRANK WEHNER, HEINRICH SAUER, and ROLF K. H. KINNE. Hypertonic stress increases the Na^+ conductance of rat hepatocytes in primary culture

537 BERND WALZ, OTTO BAUMANN, BERNHARD ZIMMERMAN, and EVA V. CIRIACY-WANTRUP. Caffeine- and ryanodine-sensitive Ca^{2+} release from the endoplasmic reticulum in honeybee photoreceptors

VOLUME 105 · NUMBER 5 · MAY 1995

569 WEIMING LI, PETER W. SORENSEN, and DANIEL D. GALLAHER. The olfactory system of migratory adult sea lamprey (*Petromyzon marinus*) is specifically and acutely sensitive to unique bile acids released by conspecific larvae

589 SHAOYOU CHU and MARSHALL H. MONTROSE. An Na^+-independent short-chain fatty acid transporter contributes to intracellular pH regulation in murine colonocytes

617 ALAN M. WEINSTEIN. A kinetically defined Na^+/H^+ antiporter within a mathematical model of the rat proximal tubule

643 PAUL S. JACKSON and KEVIN STRANGE. Single-channel properties of a volume-sensitive anion conductance. Current activation occurs by abrupt switching of closed channels to an open state.

661 PAUL S. JACKSON and KEVIN STRANGE. Characterization of the voltage-dependent properties of a volume-sensitive anion conductance

VOLUME 105 · NUMBER 6 · JUNE 1995

677 JOHN C. PARKER, PHILIP B. DUNHAM, and ALLEN P. MINTON. Effects of ionic strength on the regulation of Na/H exchange and K-Cl cotransport in dog red blood cells

701 THOMAS J. NUTTER and DAVID J. ADAMS. Monovalent and divalent cation permeability and block of neuronal nicotinic receptor channels in rat presynaptic ganglia

725 ALFONSO ARAQUE, DANIEL CATTAERT, and WASHINGTON BUÑO. Cd^{2+} regulation of the hyperpolarization-activated current I_{AB} in crayfish muscle

745 B. N. COHEN, A. FIGL, M. W. QUICK, C. LABARCA, N. DAVIDSON, and H. A. LESTER. Regions of β2 and β4 responsible for differences between the steady state dose-reponse relationships of the α3 β2 and α3 β4 neuronal nicotinic receptors

765 JOS A. H. VERHEUGEN, HENK P. M. VIJVERBERG, MARGA OORTGIESEN, and MICHAEL D. CALAHAN. Voltage-gated and Ca^{2+}-activated K^+ channels in intact human T lymphocytes. Noninvasive measurements of membrane currents, membrane potential and intracellular calcium

795 HIROKO M. SAKAI and KEN-ICHI NAKA. Response dynamics and receptive-field organization of catfish ganglion cells

815 HIROKO M. SAKAI, J.-L. WANG, and KEN-ICHI NAKA. Contrast gain control in the lower vertebrate retinas

837 JANET DONNELLY and BARRY S. PALLOTTA. Single-channel currents from diethylprocarbonate-modified NMDA receptors in cultured rat brain cortical neurons

861 VLADIMIR V. CHERNEY, VLADISLAV S. MARKIN, and THOMAS E. DECOURSEY. The voltage-activated hydrogen ion conductance in rat alveolar epithelial cells is determined by the pH gradient
